

Appl. No. 10/050,520

Amdt. dated Aug. 26, 2004

Reply to Office Action of July 20, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-58 (canceled)

59. (currently amended): In a reminder device, the device comprising:

- a. a cylindrical container having an exterior side surface;
- b. a deformable sheet ~~mounted~~ mountable as a continuous loop member around said exterior side surface of said container, said ~~mounted~~ loop member rotatable to each of a plurality of ~~selected selectable~~ positions;
- c. anti-rotation means for engaging said loop member to disallow rotation of said loop member from one of said selected selectable positions.

60. (previously presented): A device as in claim 59 wherein said loop member defines a structural area for engagement.

61. (currently amended): A device as in claim 59 and further comprising a band support member adapted to support said loop member.

62. (currently amended): A device as in claim 59 ~~and further comprising a band support member, said band support member having means for attachment~~ 61 and further including means for attaching said support member to said container.

63. (currently amended): A device as in claim 59 ~~and further comprising a band support member, 61 wherein~~ said band support member ~~defining~~ defines a structural area adapted to receive engagement therewith said loop member.

64. (previously presented): A device as in claim 59 and further including co-operating indicia.

65. (currently amended): A device as in claim 59 ~~and further including 64 wherein said co-operating indicia which~~ include an arrangement of times co-operating with a pointer adapted to point to any one of said times.

66. (currently amended): A device as in claim 59 ~~wherein indicia may 64 wherein said indicia~~ can further be inscribed customized.

67. (currently amended): A device as in claim 59 ~~further comprising a band support member adhesively attached to said container and further including an adhesive.~~

Appl. No. 10/050,520

68. (currently amended): A device as in ~~claim 59 wherein~~ claim 67 wherein said loop member includes an adhesive is pressure sensitive.
69. (currently amended): A device as in claim 59 ~~wherein said loop member further has gripping means to aid grasping said loop for displacement wherein said container is a pharmacy container~~.
70. (currently amended): A device as in claim 59 ~~and further comprising a band support member, said band support member having anti-displacement means for limiting displacement of said loop member wherein said ant-rotation means is chosen from a list which includes; an interengageable member, a détente, a tooth, a notch, a deformable member~~.
71. (previously presented): A device as in claim 59 and further including a prescription label.
72. (currently amended): In a reminder device, the device comprising:
- a cylindrical container having an exterior side surface;
 - a deformable sheet, said sheet adapted to adhesively forming form a continuous loop member;
 - said continuous loop member ~~retained~~ retainable on said container and said continuous loop member movable to each of a plurality of ~~selected~~ selectable positions;
 - selectable anti-displacement means for engaging said continuous loop member to disallow movement of said continuous loop member from a first one of said selectable positions to a second one of said selectable positions.
73. (previously presented): A device as in claim 72 wherein said loop member defines a structural area for engagement.
74. (currently amended): A device as in claim 72 and further comprising a band support member adapted to support said loop member.
75. (currently amended): A device as in claim ~~72~~ and further comprising a band support member, said band support member having means for attachment 74 and further including means for attaching said support member to said container.
76. (currently amended): A device as in claim ~~72~~ and further comprising a band support member, 74 wherein said band support member ~~defining~~ defines a structural area adapted to receive engagement therewith said loop member.

77. (previously presented): A device as in claim 72 and further including co-operating indicia.
78. (currently amended): A device as in claim ~~72 and further including 77 wherein said co-~~ operating indicia ~~which~~ include an arrangement of times co-operating with a pointer adapted to point to any one of said times.
79. (currently amended): A device as in claim ~~72 wherein indicia may 77 wherein said indicia~~ can further be inscribed customized.
80. (currently amended): A device as in claim 72 ~~further comprising a band support member adhesively attached to said container and further including an adhesive.~~
81. (currently amended): A device as in claim 72 ~~wherein said loop member further has gripping means to aid grasping said loop for displacement wherein said container is a pharmacy container.~~
82. (currently amended): A device as in claim 72 ~~and further comprising a band support member, said band support member having anti-displacement means for limiting displacement of said loop member wherein said ant-displacement means is chosen from a list which includes; an interengageable member, a détente, a tooth, a notch, a deformable member.~~
83. (previously presented): A device as in claim 72 and further including a prescription label.
